

PROMIL LESS + C €

= A reliable and safe alcohol test

We are proud and happy to announce that we have registered Promilless alcohol tests as class I medical devices and have the right to carry the CE Mark. This has been an intensive journey and an important achievement for us as we take the next strategic steps towards the international market.

The CE Mark tells our customers that our products meet all the requirements of a medical device. CE Mark is a guarantee of quality and suitability of our test for both consumer and clinical use.

Our goal is to bring new products to market based on our unique expertise. The CE Mark and our systematic quality strategy ensure that our products comply with all relevant EU requirements.
